

Desu Kasaye

Fourth-year Software Engineering student (5-year program) at Haramaya University with strong foundations in software development, algorithms, and system design. Passionate about building practical, user-focused applications and solving real-world problems through technology. Experienced in academic projects involving web development, databases, and machine learning, with a strong willingness to learn, adapt, and grow as a professional software engineer.

I'm a fourth-year Software Engineering student at Haramaya University who enjoys building practical, real-world web applications. I'm especially interested in full-stack development and enjoy turning ideas into functional, user-friendly systems while continuously learning new technologies.

EDUCATION

BACHELOR OF SCIENCE I SOFTWARE ENGINEERING

Haramaya University

01/2022 - Present

WORK EXPERIENCE

Academic Web Development Projects

haramaya university

02/2023 - Present

Achievements/Tasks

- Developed web-based applications as part of academic coursework using **HTML, CSS, JavaScript, React, Laravel, and ASP.NET**, focusing on responsive design, functionality, and clean code structure.

ORGANIZATIONS

haramaya university (01/2022 - Present)

student

CERTIFICATES

web Development from Udacity , pre-internship training in software engineering from head department of software engineering

PERSONAL PROJECTS

E-Commerce Web Application

- Developed a full-stack e-commerce web application using Laravel, featuring product management, user authentication, and order processing.

Holistic Exam Management System

- Built a web-based exam management system using **ASP.NET** to manage exams, questions, users, and results with role-based access control.

Hospital Appointment Booking System

- Designed and implemented a hospital appointment booking system using the **MERN stack (MongoDB, Express, React, Node.js)** to enable online appointment scheduling and management.

ACHIEVEMENTS

Academic Software Projects Completion

Description: Successfully designed and implemented multiple academic software projects using modern web technologies including Laravel, ASP.NET, and the MERN stack.
